

## POWERCUBES™ + Minerals

### PROTEIN & MINERAL SUPPLEMENT FOR BEEF CATTLE ON PASTURE

#### TYPICAL ANALYSIS

Crude Protein	(Min)	28.0 %	Zinc	(Min)	330 ppm
Crude Fat	(Min)	6.0 %	Copper	(Min)	110 ppm
Crude Fiber	(Max)	10 %	Manganese	(Min)	220 ppm
Calcium	(Min)	0.75 %	Cobalt	(Min)	4.5 ppm
Calcium	(Max)	1.50 %	Iodine	(Min)	10 ppm
Phosphorous	(Min)	0.80 %	Selenium	(Min)	0.1 ppm
Salt	(Min)	NONE ADDED	Vitamin A	(Min)	17,000 IU/lb
Potassium	(Min)	1.0 %	Vitamin D	(Min)	1,700 IU/lb
Magnesium	(Min)	0.3 %	Vitamin E	(Min)	17 IU/lb

#### FEEDING DIRECTIONS

Feed as a protein and energy supplement to cattle maintained on good-quality range pasture at the rate of 3 to 5 pounds per head per day to mature cows, heifers and bulls. Feed yearlings and calves at the rate of 2-3 pounds per head per day. Feeding rate will vary depending on quantity and quality of available forage and animal age and condition. This is a complete supplement; no additional vitamin and mineral supplementation is required when fed at the recommending rate. However, plain white salt (either loose or blocks) should always be available on a free-choice basis. An adequate supply of long-stem forage or roughage (at least 2% of BW) and fresh, clean water should always be available.

#### WARNING

**Do not feed to sheep or goats due to high copper levels.**
